0One Technologies
Research, Innovation, Revolution & Digitalization

- **0One Human Resources:**

All-in-one: Core HCM, Talent Management, Payroll, HR Analytics, etc.

Out-of-box, Cloud Native

Core HR Management::
- Employee Information Management.
- Compensation & Benefits Management.
- Payroll Management

Employee Life Cycle Management - starting from hire to retire.

A complete workforce administrative module to take care of all your workforce activities.

Talent Acquisition.

Performance Alignment.

Talent Development.

A fully web-based Payroll solution.

With HR Analytics solution you can enhance your decision making having the right data at the right time.

- **0One Inventory:**

Cutting-edge automation and advanced inventory system to manage any warehouse.

Out-of-box. Cloud native system.

Get the most efficient stocking method and improve all your internal operations. Odoo's double-entry inventory has no stock input, output or transformation. Instead, all operations are stock moves between locations.

With fully automated replenishment, use order points and automated RFQs to make your supply chain more efficient than ever. Offer cutting-edge automation and advanced routes to manage any warehouse.

Track every stock move from purchase to warehouse bin to sales order. Trace lots or serials upstream or downstream from anywhere in your supply chain.

Make smarter decisions with real-time dynamic reports that you can save and share with anybody. Keep key information at your fingertips with custom dashboards.

- **0One Purchase:**

Out-of-Box. Cloud Native System.

Improve your purchase and inventory performance with procurement rules depending on stock levels, logistic rules, sales orders, forecast manufacturing orders, etc. Select different replenishment methods for each product depending on your manufacturing and delivery strategies.

Easily import suppliers' price lists and references to make smarter purchase decisions based on promotions, quantities and special contract conditions. Keep track of a product availability in your supplier's stock and check your order status.

Launch purchase tenders, integrate vendor's answers in the process and compare propositions. Choose the best offer and send purchase orders easily. Use reporting to analyze the quality of your vendors afterwards.

Get accurate statistics on your suppliers' performance through flexible reporting: delivery delays, negotiated discounts on prices, quantities purchased, etc. Integrate purchases with analytic accounting to analyze your contracts' profitability.

0One Technologies
Research, Innovation, Revolution & Digitalization

- **0One Manufacturing:**

All-in-one: MRP, Quality, Maintenance and PLM fully integrated.

Out-of-box. Cloud native system.

0One Manufacturing is a flexible, powerful and valuable system - all you need in a single software from Engineering to Manufacturing Engineering, Quality Management, Maintenance and Supply Chain, reinvent your manufacturing.

Manage your products into assembly lines or manual assembly. Launch production of items needed in the final assembly of your products. Use barcode to speed up your manufacturing operations. Manage repairs of items under warranty or as a service.

Use make-to-order rules, minimum stock rules or the master production schedule to automate procurements. Let the scheduler compute everything for you. Use routes, constraints and lead time to optimize inventory level and avoid shortages.

Control your productivity with real-time Overall Equipment Efficiency (OEE) reports and monitor the 6 big losses of TPM. Track maintenance KPIs like MTTR and MTBF.

Fully integrated with other 0One Applications.

0One Technologies
Research, Innovation, Revolution & Digitalization

- **0One Healthcare:**

Out-of-Box. Cloud Native.

The Healthcare industry is constantly striving to improve patient care experience, optimize health outcomes and reduce healthcare costs through healthcare consulting. The number of legacy systems and the high amount of sensitive personal information makes healthcare one of the most challenging industries to transform.

In order to managing health outcomes, the focus of the organizations is on cost reduction, operational efficiency and delivery of care. Realizing this is only possible when the organizations modernize their technology systems, integrate the different systems they currently operate on and streamline the way people and processes operate.

In essence, 0One HealthCare software application offers a wide range of Next-Generation healthcare modules namely as Hospital Information System, Clinical Laboratory Information System, Radiology Information System, Endoscopy Image Processing and Reporting System, Picture Archiving and Communication System, Bidirectional Host Communication System, Telemedicine, etc. Our healthcare solution comply with healthcare regulations and procedures (e.g., HIPAA, HITECH, ICD-10, CAQH CORE and clinical/administrative data integration).
